Approximately how many hours per week do you fish? _____

How many tournaments per year would you like to fish? _____

Do you own a boat meeting B.I.A. and Coast Guard Specifications? YES _____ NO _____

What are your reasons for wanting to join this club? _____

Bass fishing at this level is expensive; consider boats approaching \$50,000 and trucks in the \$30,000 to \$50,000 range and the price of gas and oil continuing to rise. Along with the rise in the cost of the boats and trucks, insurance and upkeep have also increased.

To participate in our club tournaments all participants are required to share expenses. Currently these costs run from \$40.00 per day upwards based on the distance traveled and the current cost of gas. These costs are set by the Tournament Director and should be considered minimums. Each boat owner has the option to keep track of actual costs and his partner would then be expected to pay half.

Are you willing and able to pay these costs? YES _____ NO _____

This club has a fixed membership, if the membership is presently filled, would you like us to hold your application? YES _____ NO _____

If you are joining as a non-boater you may be excluded from a tournament draw based on seniority if the number of boaters in the draw is less than that of the non-boaters wishing to fish that tournament.
